Loans to risky areas by banks

†293. DR. MURLI MANOHAR JOSHI:
SHRI RAM JETHMALANI:

Will the Minister of FINANCE be pleased to state:

(a) whether it is a fact that public sector banks of the country have given more loans to risky areas during the year, 2005-06 as compared to the previous year;

(b) if so, to what extent its percentage is more and whether such risky areas have been identified;

(c) if so, the details thereof; and

(d) the percentage of loan out of the total loans given to each sector by these public sector banks during the said year?

THE MINISTER OF FINANCE (SHRI P. CHIDAMBARAM): (a) to (d) Exposure of banks to the Capital Market and Real Estate sectors are generally identified as exposure to sensitive areas. The exposure of Public Sector Banks to the Capital Market increased from 1.23% of total advances as at the end of March, 2005 to 1.26% of the total advances as at the end of March, 2006. However, exposure to the Real Estate sector of these banks increased from 2.59% of total advances to 14.65% of total advances during the same period, essentially due to inclusion of loans secured by residential mortgage in the definition of Real Estate sector since June, 2005. Thus this figure is not comparable with the figure of March, 2005.

The Bank-wise data of public sector banks regarding Capital Market exposure, Real Estate exposure and their percentage to total loan and advances pertaining to domestic operations of the banks, are given in the Statement.
